PRESS RELEASE

Guernsey, September 21st, 2015:

Freedom Asset Management ('Freedom') is delighted to announce the launch of Freedom Victory Special Opportunities Fund within its Guernsey-based investment fund range, Freedom Global Funds PCC Limited.

Freedom's Victory Special Opportunities fund is an actively managed equity fund, which seeks out the best ideas in the small/mid-cap sector, with a strong bias towards AIM-listed healthcare, technology and resource stocks. The fund's advisor, Bradshaw Asset Management, is led by Mark Bradshaw, a veteran of this asset class.

Adrian Harris, Principal at Freedom said, "It is a great privilege to work with Mark Bradshaw. Mark comes with a strong track record, having been head of UK Equities at Mercury Asset Management and then embarked in a solo venture since 1997, where he has been managing investments for family offices and a network of high net worth investors. We believe at Freedom that Mark's experience and knowledge of the opportunities space will be particularly attractive to European institutional investors who are looking for strong alpha oriented stock pickers."

Mark Bradshaw, Founding Director of Bradshaw Asset Management Limited: "London is one of the best place in the world to attract small cap businesses who are looking to access a major capital market. Our investment process targets companies that we believe will become dominant over the next 10 years in rapidly changing and re-rating sectors such as technology and healthcare. We research early-stage companies who have an edge, either through a proprietary scientific

formula, or technology they have developed. We look forward to working with Freedom to grow the Victory Special Opportunities Fund amongst institutional investors across Europe. “

Sandrine Reynaud, CEO: "We are excited by the development of Freedom and are well on track to build a \$100m AUM business in our first year of operation. Mark has a great talent for finding unknown, up and coming smaller businesses that have the capacity to grow strongly over the next few years. We strongly believe that managers offering specific active niche strategies offer the greatest value to investors."
